

Biomat

WHAT IS A BIOMAT?

Amethyst, Far Infrared Rays and Negative Ions

The Professional Biommat emits Far Infrared Rays (FIR) that penetrate the human body up to six inches. FIR, discovered initially by NASA, are now being used in all kinds of healing treatments (saunas are the most popular) as thermotherapy, which has an extraordinary effect on joints and muscles as well as the circulatory system. In the latest research, infrared rays have been proven to provide relaxation and warmth similar to the heat that comes from the sun. The Pro Biommat also emits Negative Ions our bodies need to be healthy but are less and less abundant in our modern environment. Together with amethyst, these three elements provide the Triple Healing effects for which the Biommat has become famous and why professionals in many healing fields are taking notice of its muscle pain relieving ability, and relief from joint pain and arthritis pain, as well as its beneficial effect on local circulation.

The Biommat is approved by the FDA for the following claims.

The 510k indications for use states "Temporary relief of minor muscle pain, minor joint pain and stiffness, joint pain associated with arthritis, muscle spasms, minor sprains, minor strains, minor muscular back pain, relaxation of muscles, and temporary increase of local circulation where applied."

WHAT DOES A BIOMAT DO?

Richway & Fuji Bio approved claims for the Biommat products:

- Relieves minor muscle pain in areas where applied
- Increases blood circulation in areas where applied
- Reduces stress and fatigue
- Soothes and relaxes
- Eases minor joint pain, and stiffness
- Supports the immune system
- Improved sleep (if associated with pain relief)
- Reduced inflammation (where applied)
- Increased tissue oxygen
- Minor muscular back pain
- Temporary relief of sprains and strains
- Temporary relief of minor muscle and joint pain and stiffness
- Temporary relief of joint pain associated with arthritis
- Temporary relief of muscle spasms
- Temporary increase of local circulation where applied
- Relaxation of muscles
- Promotes relaxation by application of heat
- Promotes restful sleep for those with occasional sleeplessness

BASED ON ADVANCED SCIENTIFIC RESEARCH

The BioMat's unique medical and therapeutic properties are based on Nobel prize-winning research into ionic channels and the same infrared technology that NASA identified as the safest and most beneficial type of light wave. By producing deep-penetrating, far infrared rays along with negative ions that activate the body at the molecular level, the BioMat is capable of administering deep soothing stimulation.

Organ Transplants – Recipients of any type of organ transplant (Kidney, Heart, Liver, etc.) should not use the Biommat. After an organ transplant, patients will need to take immunosuppressant (anti-rejection) drugs to help prevent their immune system from attacking, or rejecting, the new organ. The use of the Biommat's far infrared rays increases immune system function, which will tell your body to attack the new organ.

External Pacemaker – We recommend anyone who uses an external pacemaker that they should not use the Biommat.

FOR YOUR SESSION, The mat is placed on a massage table, you lie on the mat

Relax and Enjoy as you are immersed in the sound of the gongs.

Wear loose fitting clothing made of natural materials...Cotton. Linen. Silk
